

Ascom OfficeM

Put your organization on-call

Increasing the mobility and availability of your staff will help boost the overall competitiveness of your business. Your customers will notice the difference when they get what they want without having to wait. And your staff will feel they are doing an even better job.

Combining powerful messaging and telephony, the Ascom OfficeM gives your personnel more freedom and your customers a better service.

Direct access gives direct benefits

OfficeM is an elegant cordless phone for office environments—ensuring that your staff can be reached wherever they are and whatever they are doing. Powerful messaging – text messages are visible in the display even when you are talking on the phone—helps to keep your personnel up-to-date at all times. Furthermore, high quality voice facilitates rapid response and a more efficient use of time and resources. Immediate action can be taken even when staff are on the move. And with 11 pre-installed languages, not only is OfficeM a truly international solution, it also eliminates time wasting due to language confusion.

Packed with smart features

The phone is packed with features that are designed to save time and money. Moreover, the look and feel of the OfficeM, including time and

date on-screen, means less training is required for the user. Direct access to a centrally updated phonebook – complemented by large personal and company phonebooks – avoids the frustration of dealing with out-of-date numbers. One-key access to voice-mail saves even more time. Hands-free (both Bluetooth and traditional headsets available) and loudspeaker functions allow you to talk and work at the same time. And useful extras such as an alarm clock and calculator are there when you need them.

Making a real-life difference

Mobility is emerging as a core asset for successful businesses. OfficeM paves the way to greater freedom, flexibility and efficiency. Thanks to a complete DECT handset portfolio, Ascom is making a real-life difference to workplaces all over the world.

Features

Sending/receiving messages

Powerful messaging capabilities which allow you to view messages while talking on the phone. Receive instant messages and send text messages from one phone to another.

Compatible with the Ascom 9d system and other 9d portables.

Hands-free function

The built-in hands-free and loud-speaker function allows you to talk and work at the same time. Excellent sound quality facilitates hands-free-speech and conference calling.

Phonebooks

• **Personal (100 entries)**

Entries can be added, deleted or modified directly in the phone or by using Cordless Phone Manager (CPM) software. Supports Call-by-Name and Quick Call-by-Name for fast access.

• **Company (1000 entries)**

For numbers common to all users.

Downloaded using the CPM software tool.

Both company and personal phonebooks can be searched simultaneously.

• **Access to central phonebook**

Allows all cordless phone users direct access to a common database with an unlimited number of entries – providing up-to-date information the second it is available.

Redial

Enables you to redial the last 20 dialled, answered and missed calls.

Missed call function

In idle mode, a "Check Who Called?" alert message is displayed if there have been missed calls.

Easy access to PBX services (e.g. voicemail)

An icon indicates a new voice-mail, which can be accessed by pressing a pre-programmed key. Helps to make voice-mail usage even more efficient.

Phone & key lock

Protect the phone against misuse using a PIN code.

Protect the keypad against unintentional use using the key lock.

Large graphic display

Six lines of text and icons are shown on the illuminated display.

Adjustable contrast.

Vibrator alert

For noisy environments or when discretion is required, the built-in vibrator makes silent calls "heard".

Mute function

Press the Mute button to disconnect the microphone during a call.

Calculator

Easy-to-use and always within reach when you need it.

Alarm clock

Avoid missing appointments or deadlines. You cannot miss when the phone starts to vibrate and ring, and the warning and display lights start to flash.

Personalise your phone

Choose your own settings such as key click sound, discrete ringing, melody selection, vibrating alert, key lock, PIN code, language, display contrast, display backlight, ring volume, phone lock, and more.
