

Ascom OfficeT

Increase the mobility of your business

Easy-to-use and competitively priced, the Ascom OfficeT offers optimum speech quality, a user-friendly interface and ergonomic design to ensure maximum mobility – plus, of course, all the functions and features you need in your daily work.

Full mobility

The Ascom OfficeT is a sophisticated wireless phone for office environments, combining streamlined design with supreme sound quality for increased efficiency in the workplace. The user-friendly menu allows easy access to a wide range of features.

Easy to use

OfficeT features a scratch-proof keypad with large buttons and five navigation keys. A special function key has been added to support hands-free speech – and you can access voice-mail at a single press of a programmable key. In addition, the high contrast display provides a large viewing area with exceptional backlighting, giving you unrestricted access to the handset even when the light is poor.

The menu can be set to 17 different languages, eliminating any possible confusion and facilitating clear communication.

Convenient features

The telephone book stores up to 100 numbers and the last 20 dialled, answered and missed calls are available for speedy redial. What is more, you can update your phonebook – either directly in the phone or with the Cordless Phone Manager software tool.

The integrated loudspeaker on the back of the phone offers you hands-free functionality for conference calls or when both hands are needed elsewhere. The vibrator discreetly alerts you to incoming calls, and thanks to an integrated alarm clock you will neither miss appointments nor deadlines. Furthermore, the Office T supports all standard PBX functions and can access teleservices.

What are your needs?

Wherever you need reliable wireless communication, Ascom has the system to match your demands. Get in touch and put us to the test.

Features

Hands-free speech

A loudspeaker on the back of the phone offers excellent sound quality and can be used for hands-free speech and conference calling.

Vibrator alert

For noisy environments or when discretion is required, the built-in vibrator makes silent calls "heard".

Phone book

Contains up to 100 names and numbers.

Entries can be added, deleted or modified directly in the phone or by using Cordless Phone Manager (CPM) software.

Supports Call-by-Name and Quick Call-by-Name for fast access.

Redial

Enables you to redial the last 20 dialed, answered and missed calls.

Missed call function

In idle mode, a "Who Called?" warning is displayed if there have been missed calls.

Mute function

Press the Mute button to disconnect the microphone during a call.

Illuminated graphic display

Two lines of text with twelve characters each and one line of status icons are shown in the illuminated display.

Phone & key lock

Protect the phone against misuse using a PIN code. Avoid accidental phone calls using the key lock.

Alarm clock

Avoid missing appointments or deadlines. You cannot miss when the phone starts to vibrate and ring, and the warning and display lights start to flash.

Personalise your phone

Personalise your phone by selecting settings such as key click sound, discrete ringing, melody selection, vibrating alert, key lock, PIN code, language, display contrast, display backlight, ring volume, phone lock, and more.
