

[PROFESSIONAL SERVICE]

ASCOM IP-DECT ASSESSMENT EVALUATION OF VOIP READINESS

Ascom IP-DECT Assessment establishes your LAN network's readiness for Ascom IP-DECT systems. The service will provide your organisation with detailed reports about the performance of your LAN infrastructure with recommendations on possible enhancements and improvements in your network.

Misconfiguration and interference that affects voice traffic in your LAN network can result in faulty behaviour or even costly downtime of telephony services until rectification. Exposure to these vulnerabilities can be reduced significantly by carrying out an Ascom IP-DECT Assessment

By performing an Ascom IP-DECT Assessment prior to commissioning a system one can eliminate LAN- and VoIP-related issues by identifying problem areas ahead of deployment. This service targets customers who are ready to deploy an Ascom IP-DECT system where an edge in resiliency and reliability is top priority

Ascom IP-DECT Assessment offers an extensive evaluation of VoIP readiness in your LAN/WAN network from the vantage point of an Ascom IP-DECT system. Its sole purpose is giving your organisation a head start on targeting and resolving voice quality issues by locating bottlenecks and weak points in the LAN network before commissioning a live Ascom IP-DECT.
