

# RAPID DEPLOYMENT TO SUPPORT EMERGENCY CLINICS

## Critical DECT Communication in a box

*Pre-configured and easy setup communication solution to support clinical emergency scenarios*

### Rapid deployment within hours to support a clinical emergency

- Offers rapid deployment kit with all components included, pre-built and configured.
- Delivers robust technology with a proven deployment history in Australia and globally.
- Provides critical communications platform with Voice, Messaging, and Alarm to suit all care situations.
- Creates a stable and scalable communication solution to suit facilities needs
- IP65 rated handsets that withstand dirt, fluids, and hospital-grade disinfectants.

When a clinical emergency occurs, clinical staff are in high demand and communication becomes critical. With the high volume of patients and the urgent need in an emergency, it's important that a solution can be deployed in the minimum possible time. In these situations, we understand that wireless communication in the hospital becomes more crucial than ever.

The challenge is to create a robust and flexible communication system in a non-clinical temporary shelter, including stadiums and halls, to help respond in an emergency situation. Ascom is providing an easy and quick deployment communication solution, all in one box that will come pre-constructed and pre-configured.

### What's included in the solution?

Paging

Voice

Messaging

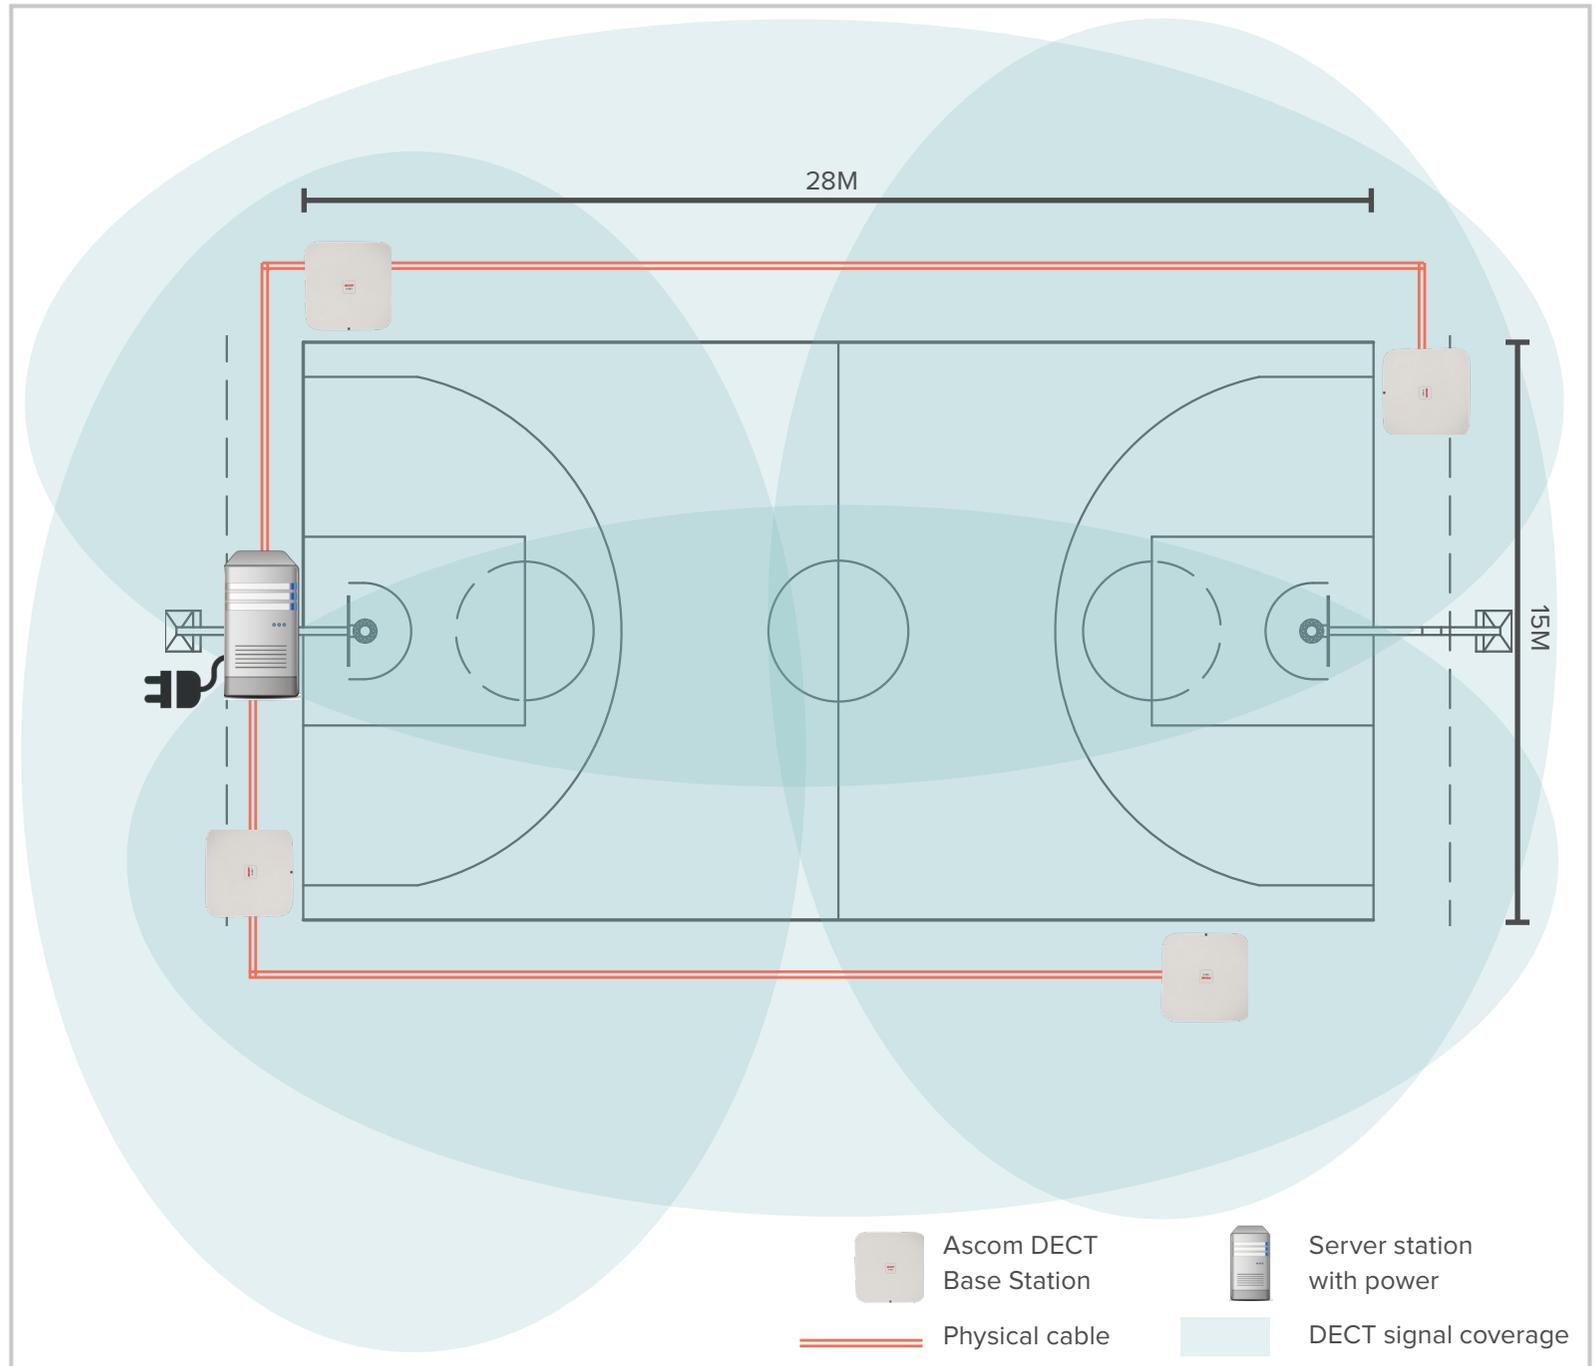

Duress

- ☑ **Messaging system:** a reliable on-site communication system that combines 2-way messaging, personal alarm with positioning capabilities. It keeps your critical communications channels open at all times to ensure the delivery of every message and alarm.
- ☑ **DECT Communication:** offers secure wireless transmissions over dedicated frequency bands, making it less prone to interference. Simplicity in its architecture maximises flexibility and scalability to fit all your requirements.
- ☑ **Ascom d81 handset:** a rugged IP65 rated DECT handset intended for the most demanding environments with excellent telephony and advanced messaging capabilities.

## Example of the Ascom Critical Communication deployment in a basketball court.

Contact your local Ascom Sales Representative today for a detailed explanation about the deployment. They are ready to help you set up a critical communication solution at your facility to cope with the current clinical emergency.
