teleCOURIER 914D
Dependable and direct messaging

For safety, for service, for response. The teleCOURIER 914D keeps people on the move informed. Practical hands-free functionality combined with a user-friendly design. This attractive and robust pager will work as your partner in any environment.

People are seldom confined to a desk all day. In almost every work place, many staff members are constantly on the move and sometimes difficult to reach. In a hospital environment, for example, doctors and nurses need fast, reliable and user-friendly access to various sources of information – lives may depend on it.

Hands-free
The teleCOURIER 914D is the dependable link between information and direct action.

With no need to press any buttons to read a message and with an automatically scrolling top display, messages can be read while the pager is placed in a pocket. Staff can respond immediately or choose to continue uninterrupted with their current task. Priority indication signals make sure that critical messages are always read.

Easy-to-read display
In addition, the high-resolution display and one button access to all settings ensures an easy-to-use and high quality message receiver. It also results in less confusion and less time needed to become comfortable using the product.

The teleCOURIER 914D can be installed as part of a new solution or integrated seamlessly into existing systems without the need for costly upgrades.

Whether it be used in manufacturing, health care, service or security sectors, teleCOURIER 914D makes sure that you get the message.

On-site wireless communications for quicker response
