## **Ascom wins so far largest order for Ascom Myco Smartphones**

**A major North European state-of-the-art hospital awarded Ascom with an order of CHF 1.8 million that includes 2,000 Ascom Myco smartphones and associated service contracts.**

This significant Ascom Myco smartphone order is an addition to an ongoing Ascom project. The original contract comprises advanced solutions for mission-critical communications, such as alert handling from patients and medical technical equipment, which are at the core of the communication of the hospital.

Ascom Myco is a purpose-built smartphone for healthcare that integrates with specialist healthcare communication systems to optimize clinical workflows and mobilize mission-critical information and communication. Ascom Myco also supports a growing library of healthcare apps.

“This is a lighthouse project for us and showcases how Ascom solutions can enhance patient safety and improve clinical workflow. That Ascom has been chosen for this high-profile project is strategically important – not only on a Northern European level, but on a global scale”, says Claes Ödman, General Manager Ascom Wireless Solutions.
