## **Ascom Wireless Solutions wins two important orders for Ascom Myco in the United States**

**Ascom secures two major deals for its purpose-built smartphone Ascom Myco, which will include a deployment of around 1500 Ascom Myco units in the United States.**

One of the largest US hospital systems with facilities across 17 states selected Ascom Myco and will install more than 1000 Ascom Myco units. Another large regional healthcare network will roll out about 500 Ascom Myco units.

Ascom Myco is a purpose-built smartphone for healthcare that integrates with specialist healthcare communication systems to optimize clinical workflows and mobilize mission-critical information and communication. Ascom Myco also supports a growing library of healthcare applications. Both projects have promising upsell and growth potential for Ascom to layer in additional solutions.

“We are proud of these two Ascom Myco wins, the largest to date in the American market,” says Claes Ödman, General Manager Ascom Wireless Solutions. “Momentum is clearly building for the Ascom Myco, and we will replicate these significant wins by leveraging relationships with the growing network of Ascom Certified Strategic Partners and capitalizing on the huge potential this market represents. We will continue to invest in this market and grow the preference for Ascom solutions at all levels of the healthcare ecosystem.”
